

Public Camp Booking — Team Ops Guide

One-page reference for how **self-service campsite reservations** work on myldma.com: customer flow, payments, emails, Klaviyo, and MRS follow-up.

Related docs: docs/CAMP_RESERVATIONS_ROADMAP.md , docs/KLAVIYO_CAMP_STAY_REMARKETING.md , docs/CARETAKER_GUEST_CHECKIN_AND_PAYMENTS.md

What this covers

All **8 LDMA reservation camps** now offer **Reserve Your Campsite** on each camp page. Bookings are tagged `public_web` in the database (distinct from caretaker-entered reservations).

Customer flow (4 steps)

Step	What the customer does
1. Dates	Pick check-in and check-out. Seasonal open/closed dates are enforced.
2. Site type	Choose a site type bucket (e.g. Full Hookup — RV). Shows availability, sold-out state, and total stay price.
3. Details	Guest: name, email, phone. Member: log in for member pricing; contact fields pre-filled.
4. Payment	Choose pay in full or \$100 deposit (deposit only if total > \$100). Redirect to Stripe to pay.

After payment, the customer returns to the camp page (`?reservation=success` or `?reservation=cancelled`).

Member vs guest rules

	Guest	Member (logged in, active membership)
Max stay	10 consecutive nights	No cap
Rates	Daily guest rate × nights	Daily member rate (≤29 nights) or monthly rate prorated (30+ nights)
Contact info	Required at checkout	Uses member email/name on file

What happens when payment succeeds

Stripe notifies the site automatically. **No reservation exists until payment clears.**

1. **Site assigned** — System picks the next available site in the chosen type (by sort order). The customer chose a **type**, not a specific site number; the assigned site appears in the confirmation email.
2. **Reservation created** — Status `reserved` , source `public_web` .
3. **Payment recorded** — Applied to rolling **30-day billing periods** from check-in.
4. **Receipt email** — Sent immediately (see Emails below).
5. **Klaviyo profile updated** — Stay dates, camp, member/guest type, “Next Camp Booked,” etc.

Payment options & when balances are due

Option	Amount charged now	What’s still owed
Pay in full (short stay)	Entire stay	Nothing — paid in full
Pay in full (long member stay, 30+ nights)	First month only	Month 2+ on each billing period’s due date
\$100 deposit	\$100	Remainder of first month before arrival (long stays) or full balance before arrival (short stays)

Pricing summary

- **Guest:** daily rate × nights (every stay). Full balance due before arrival if not paid in full.
- **Member, short stay (≤29 nights):** member daily rate × nights. Full balance due before arrival if not paid in full.
- **Member, long stay (30+ nights):** member monthly rate × (nights ÷ 30), split into rolling **30-day billing periods**. Only the **arrival month** balance is due before check-in; later months are due at the start of each billing period.

Example — 90-night member stay, first month paid at booking

- Month 1: paid at checkout.
- Month 2: due ~30 days after check-in (reminders at 14 / 7 / 3 days before that date).
- Month 3: due at the start of month 3, and so on.

Emails (SendGrid)

All customer emails are **built in code** (`lib/sendgrid.ts`) and sent via the SendGrid API when `SENDGRID_API_KEY` is set. No separate Klaviyo templates are required for these transactional

messages.

Email	When	To	MRS visibility
Payment receipt	Immediately after Stripe payment	Customer	BCC MRS + CC <code>gricci@goldprospectors.org</code>
Reservation confirmation	Immediately after payment (webhook); cron backfills any missed after 15 min	Customer	BCC MRS
Balance reminder (before arrival)	14 / 7 / 3 days before check-in	Customer	Only if arrival-month (or full short-stay) balance remains
Balance reminder (monthly)	14 / 7 / 3 days before each billing period due date (month 2+)	Customer	Long member stays only
MRS daily digest	Every morning (~7:30 AM UTC)	MRS inbox	New <code>public_web</code> bookings (last 24h) + collectible balances within 7 days

Confirmation email includes: camp, dates, site type, **assigned site number**, arrival-month balance (if any), next scheduled payment (long stays), and a pay link when payment is collectible now.

Pay balance page charges only the **amount due now** (arrival-month remainder or current billing period), not the entire remaining stay.

Pay balance

Secure link: `https://myldma.com/reservations/pay?token=...`

- Appears in confirmation and reminder emails when a payment can be collected.
- No login required — token valid ~120 days.
- Stripe checkout for the **current amount due**; receipt sent on payment.

Klaviyo (marketing / CRM)

On every new reservation (public web or caretaker), if Klaviyo is configured:

- Profile is **created or updated** by email.
- Customer is **subscribed to marketing** if not already (source: `camp_reservation`).

- Key properties: Most Recent Camp, check-in/out dates, nights, member vs guest, **Next Camp Booked**, and historical **Camps Stayed**.

Details: `docs/KLAVIYO_CAMP_STAY_REMARKETING.md` .

Automated schedules (background jobs)

Job	Frequency	Purpose
Confirmation emails	Every 15 minutes	Delayed confirmations for new public web bookings
Balance reminders	Daily	Before check-in (arrival-month balance) + before each later billing period
MRS digest	Daily	Summary email to MRS
Stay thank-you	Daily	Post-checkout thank-you + Klaviyo "completed"

MRS team — what to watch for

1. **BCC on receipts and confirmations** — Copies of customer payment receipts and reservation confirmations for all public web bookings.
2. **Daily digest** — New online bookings and balances collectible within 7 days (not entire multi-month balances).
3. **Assigned site number** — Customer picks a site **type** online; specific site assigned at payment.
4. **Long stays** — First month may be paid at booking; later months bill on schedule. Customers are not asked to pay the full stay before arrival.
5. **Caretaker vs public web** — Caretaker portal uses the same billing periods but different email templates.

Quick reference

Camp page → Reserve modal → Stripe payment

↓

Webhook: assign site, create reservation, receipt + Klaviyo

↓

~15 min: confirmation (site #, arrival-month balance or next due date)

↓

Reminders: before check-in + before each monthly period

Check-in at camp (caretaker portal)

Key settings (for IT / deploys)

Item	Value / note
MRS email	RESERVATION_MRS_NOTIFY_EMAIL (default info@lostdutchmans.com)
Stripe	Checkout + webhook required in production
SendGrid	SENDGRID_API_KEY , SENDGRID_FROM_EMAIL , SENDGRID_FROM_NAME
Klaviyo	KLAVIYO_PRIVATE_API_KEY , KLAVIYO_LIST_ID (optional)
DB migrations	camp-public-booking , camp-balance-reminders , camp-billing-period-reminders

Last updated: March 2026 — reflects public web self-service booking on myldma.com.
